GETTING STARTED | SPEEDBALL

Photo Emulsion

The photo emulsion method of screen printing is perhaps the most exciting method created! It makes fine line drawings, computer generated images, various hand and commercial lettering and photographic half-tone positives. The photo emulsion method requires:

- 1) A screen prepared with the photo emulsion / sensitizer mixture
- 2) Film positive or a printed transparency film
- 3) Light source (we recommend a BBA #1 photo flood) that will transfer the opaque images on your positive to the light sensitive printing screen.

Supplies

DIAZO Photo Emulsion

4579 26.4 oz. Bottle

—Must be mixed with # 4578 sensitizer, 3 year shelf life unmixed.

\$24.95

Use SpeedBall Inks

DIAZO Sensitizer

4578 2 oz. bottle

#4579 Diazo photo emulsion (sensitizer bottle appears empty, but actually contains condensed paste that is to be 3/4 filled with water)

\$6.95

DIAZO Photo Emulsion Remover

4558 32 oz. – squeeze bottle

—When applied to the emulsion-coated screen, it reclaims the screen with minimal cleaning effort.

\$21.95

Complete Screen Printing Units Standard Grade

Standard Screen Printing Units include adjustable height back bar mounted with wing nuts: Complete 3-½ quality squeegee, ¼” hard board base: 1-1/8”

frame lumber with 10xx multifilament or polyester fabric stretched by rope method with no slip seal: glued corners with metal corrugated fasteners and wood sidekick; package of three tempered stainless steel registration guides.

Transparent Extender Base 4572 **\$14.00** Quart

Direct Emulsions

LX-660 Dual Cure

Most Inks

A diazo sensitized, durable, high quality, dual cure emulsion with excellent resistance to most ink systems.

Suitable for all general purpose, graphic and industrial applications. Its latitude, resolution and edge definition are excellent, which makes it ideal for fine line and half tone printing. Very durable and fast drying for good productivity. LX-630 is blue in color and is supplied with a diazo sensitizer in powder form. Fine line & half tone printing.

28 oz **\$35.00** Gallon **\$82.00**

TLX Dual Cure

Most Inks

TLX is a multi-purpose, fast exposing diazo photopolymer emulsion with excellent edge definition and resolution. TLX's very high solids content provides better stencil build per coat, excellent bridging of coarse mesh, and faster drying.

28 oz **\$41.00** Gallon **\$87.00**

QTX

Pre-Mixed

Dual Inks - Solvent or Water Inks

QTX is a presensitized, ready-to-use, ultra-fast-exposing SBQ photopolymer direct emulsion for imprinted sportswear printing with plastisol and water based textile ink.

Handle under yellow safelite

28 oz **\$36.00** Gallon **\$114.00**

569

Solvent Inks

569 provide high solids content for stencils with superb resolution and excellent edge definition, especially for fine details and halftones. All 569 emulsions exhibit complete solvent resistance and, thus afford easy stencil removal.

28 oz **\$46.00** Gallon **\$91.00**

FX88

Solvent Inks

Fast exposing FX88 produces tough stencils with good resolution, edge definition, and solvent resistance. It is ideal for low intensity sources.

28 oz **\$44.00** Gallon **\$77.00**

Water Inks

925WR-P

Stencils produced with 925WR-P are water resistant and very durable. This pale violet emulsion offers high solids content and very good resolution, edge definition and exposure latitude. 925WR-P comes with a syrup diazo sensitizer, for faster and surer mixing. Recommended for sportswear, T-shirt and textile printing.

28 oz **\$39.00** Gallon **\$76.00**

TZ

Water Inks

Ulano's blue TZ emulsions are formulated for use with water based inks, water dyes, and plastisol. TZ produces stencils with excellent mechanical resistance, good resolution and edge definition, and superb water resistance.

28 oz **\$37.00** Gallon **\$83.00**

For Solvent Based Inks

CDF Direct Film - Adheres To Wet Screen

The CDF system offers a series of presensitize photographic stencil films. CDF Direct Films is adhered to screens stillwet from the degreasing rinse. Fabric wetness softens the films emulsion, which is attracted (by capillary action) up into the mesh structure. A single squeegee stroke skims off excess water. After drying the polyester backing is removed and the screen is ready for exposure & washout with plain water. Great for shirts using Plastisol inks.

CDF	Rolls	Price
CDF-3	26" X 300"	\$120.00
CDF-4	26" X 150"	\$ 79.50
CDF-4	26" X 300"	\$135.00

Block-Outs and Screen Fillers

Ulano #10 Extra Heavy Duty

Thick Blockout

A heavy , non-flammable, water soluble blockout with drying characteristics similar to indirect films, to prevent loss of register.

Quart **\$19.95** or Gallon **\$49.95**

Ulano #66 Screen Filler- Block -Out

A non-flammable water - soluble block-out with drying characteristics similar to indirect film. To prevent loss of register. Easy to use.

The Thinner , Lighter Block-Out.

Quart **\$14.95** or Gallon **\$37.95**

Screen Printing Fabrics

Stencon Multifilament Polyester

Polyester Fabric

Mesh 40" Wide per Yard

This Polyester Multifilament is the world's finest quality, it is highly recommended for its consistently flawless weave and outstandingly uniform mesh openings. The material stretches very tight and holds excellent register. Durable, antistatic treated. Highly recommended for school Graphic Arts Shops.

6XX	\$8.50
8XX	\$9.50
10XX	\$10.50
12XX	\$12.50

Polyester Monofilament Fabric

Guaranteed to produce superior screen prints.

Specially dyed to eliminated light bounce & halo.

Heat set & prestretched for easy handling & dimensional stability.

Wet fabric using warm tap water: stretch fabric uniformly & tightly.

Excellent for fine lines, solids & halftone reproduction.

*Pre-Stretched Flexible & Heat Set

TB-1145 1" -1-1/4" (2.5 x 3cm) Bolts/100 Box \$12.00

Temperature Test Strips

Temperature strips can be used for proof of heat attained in screen printing and textile processing during curing and may also be used to check temperatures of transfer presses.

Test Strips available for different temperatures.

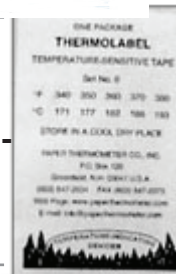

ACCX-TSAA 240-280 F.

ACCX-TSBB 290-330 F.

ACCX-TSCC 340-380 F. AC-

CX-TSDD 190-230 F.

16 strips per pack \$17.25

Heat Spy Temperature Sensor Gun

Heat Spy Temperature Sensor Gun is a low cost electronic device used for verifying & monitoring dryer temperature. Use it to locate & control heat build up in the substrate, potential electrical system failures or possible over heating. Excellent for use in critical heat sensitive applications, such as textile and UV curing, or anywhere where maintaining temperature is important. Powered by a universal 9 volt battery, measures temperatures from 0 to 500° F.

Fits in pocket.

HS-MD2 \$139.00 with Carry Case.

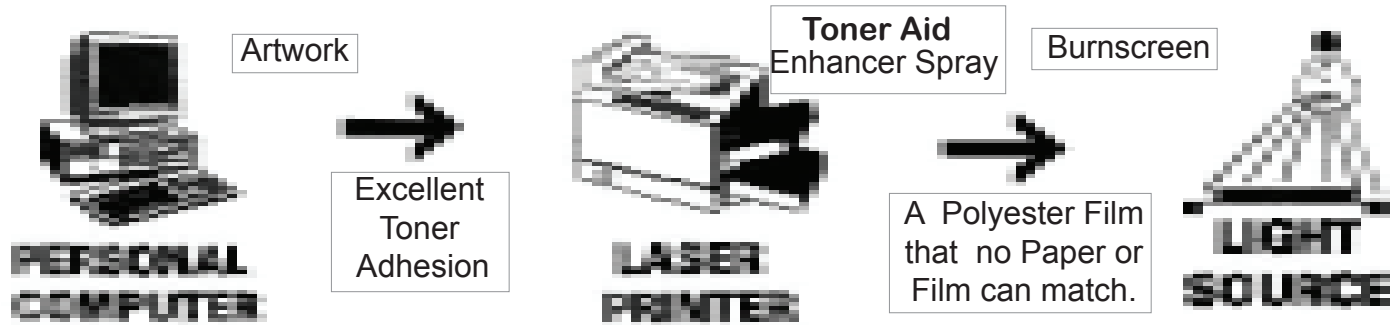

HS-MD2R \$149.00 with Carry Case Laser Point Model

A Little History: Badger Graphic Sales started as a busy letter press print shop in the mid 1920's. The shop had a strong apprentice program, working closely with local high school printing teachers. Badger Graphic Sales, Inc has evolved to our current catalog and on-line sales; with 90 years of service to "The Trade" and education.

Screen Printing Film-Laser-InkJet-Process Camera⁷

Positives with Kimodesk Direct To Screen - Laser Printer

Create your own film separations with no need of cameras, processors or chemicals.

Simply create or open the design on your computer, print separations through your laser printer using Kimodesk style film, then burn your screens as you normally would. It's that simple.

- With polyester film there is no shrinkage, stretching, curling or wrinkling... plus a 25% blacker image than you get with vellum.
- Over vellum, Kimodesk style film allows you to separate multiple color prints while retaining tight registration.
- Available in 3 mil thickness packed 100 sheets per box.

8½ X 11 - \$35.00	8½ X 14 - \$39.00	11 X 17 - \$65.00	12x18 - \$75.00
--------------------------	--------------------------	--------------------------	------------------------

Kimto Tech leads the direct to screen revolution with Kimodesk. Burn your screens without the need for cameras, processors or chemistry. Output Kimodesk using your laser printer or copier and then

Inkjet Printer Clear Film - Polyester Positives - On Your InkJet Printer

Economical transparent polyester with a "Universal Coating" for use with most desktop and large format printers.

Best Results Use Toner Aid After Copying.

Cut Sheets

8.5 X 11-100	\$45.00
8.5 X 14-100	\$55.00
11 X 17-100	\$89.00
12 X 18-100	\$99.00

Casey's Translucency - Vellum Positives - Laser Printer

High quality vellum like paper designed for laser printers & copiers. Use this laser printer output as a positive for burning screens. Casey's is also more durable and stable than other vellums. The sheet will not shrink and wreck your separations. Casey's is designed specifically for use with laser printers & copiers and will not jam or damage your printer.

Size	Quantity	Price
8.5 x 11	250 Sheets	\$79.00
11 x 17	500 Sheets	\$180.00

Use Toner Aid after copying

Casey's Ultra Black Toner Aid - Sprayway #208

Ultra black causes toner particles to "fuse" together, making blacks more opaque. Documents treated with Ultra Black not only look darker to the eye, and appears even darker to screen printing exposure units, process cameras, plate markers, scanners and copy machines.

Aerosol Can \$14.00 Each

Process Camera-Darkroom Positive Film - R.A. Developer

This is the best product for film positives!

You get the highest quality positive available. Just as good, if not better than, the Diffusion Transfer (PMT) Clear Receiver Film. A premium darkroom optically clear film. Makes direct positives in your process camera. Use only with Rapid Access Developer

When Available - Please Call for Sizes and Pricing

SPAT-012	12" Long	1 3/4" Wide Blade	\$18.95

Spatula / Scraper

Add spread or clean inks from screens and remove ink from squeegees with this uniquely designed scraper. Special slot clean 3 sided of 3/8" or thinner squeegee blade at once. Scraper is 4 1/2" Wide.

S/S Spatula / Scraper \$12.75

Fabric Cleaning Brush

Hardwood handle brushes have stiff black polypropylene bristles that resist acid. Remove stubborn foreign matter and oils from cloth or metal. Perfect for use with underline mesh prep when getting screen ready for image. A must in every shop. 2 3/8" X 6" with 7/8" bristles.

CB-638 Fabric Cleaning Brush \$10.95

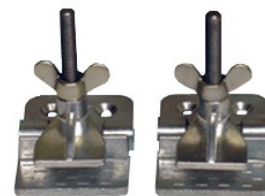

Clog Removing Brush

Remove stubborn mesh clogs in all types of mesh and wire cloth. Wooden handle with brass bristle can be used with cleaners.

CRB-275 Clog Removing Brush \$6.95 (2)

Hinge Clamp

Cast hinge clamp's easy to use hinge constructed from cast steel holds all wood or metal screens for 5/8" to 2" thick. Locking action firmly holds screens in place for positive registration. Allows fast changeover between jobs.

CHC-100 1 Pair Cast Hinge Clamps \$24.95

Hinge Clamp

Heavy duty steel holds tite hinge clamps. Adjustable hinge clamps are the strongest and most economical clamps in the industry. The plated steel clamps handle all frames (wood or metal) up to 2" high. Tighten clamps to hold frame in register white printing fast set up. Ideal for prototype or production use. Complete with wood screws and instructions.

HC-101 1 Pair hold Tite Steel Clamps \$22.95

Screen Printing Supplies

White Testing Squares - For student folios.

Great for testing multi color registration. These new strike off "PELLONS" are a blend of polyester and rayon will accept all kinds of ink including air brush and hand color. Register with "Pellons"

Medium Weight (2 OZ)

Black Available

14" X 14" - 100	\$28.00

Designed to feel like cloth and work even better.

- Patented technology allows this thick, strong wiper to absorb oil and water faster than rags or shop towels.
- Retains strength through harsh use, even when used with solvents.

Screen Printing Supplies

Frame Lumber Cord

Especially made to fit the grooves of your frame lumber. This cord is uniform to prevent fabric slippage. Hammer in cord flush to wood, and then use stretching tool to push cord deeper into groove for more tension. Available in three diameters to accommodate your screen making needs. Standard is the most popular cord. Large is for slightly wider grooves in lumber or thinner mesh. Small is for slightly narrower grooves or coarser mesh.

100 FT ROLL		1000 FT ROLL

Pallet Mask 14" X 108' \$119.95

Holds T-Shirts & other textiles securely on the pallet with pallet mask cloth and in place for printing while lasting through long production runs. Keeps textiles in register avoids wrinkles and misprints. Simply cut to size. Put in place on the pallet and remove protective sheet to adhere.

No. 5219

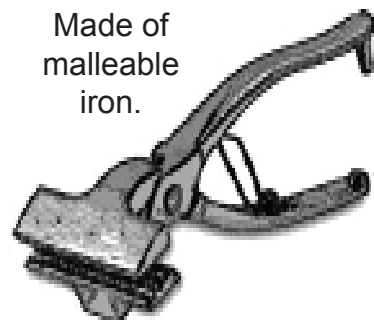

Stretching Pliers

Pliers and hammer combination tool for stretching silk, nylon or wire mesh.

Stretching Pliers

No.5219 \$19.50

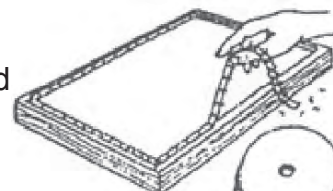

Made of malleable iron.

Tapes

Cloth Staple Tape ST-916- \$12.95

Strong polyester synthetic staple tape is placed over stretched fabric on frame and then stapled through mesh to frame. Holds mesh in place and prevents slippage. Also use staple tape for extra reinforcement, strength to hold fabric in place, after applying frame adhesive. For easy and quick reclaiming. Pull tape away to remove most of the staples at one time, not affected by solvents in dip tanks.

9/16" X 72 Yards

Block Out Tape - White/Blue/Red

Block-Out tape is a great substitute for liquid Block-Out. This tape is easy to apply. It can be easily removed. It has excellent solvent resistance and leaves no adhesive on your screen.

#20002 2" X 36 Yards \$6.95 each

Rotary Loads....

The key to rotary load is that one person does the printing while your helper(s) unload and load garments. As soon as one garment is printed the helper spins the platen to the next position. While you print a "fresh" garment your helper unloads the finished product then loads on a blank garment. With multi-color work this process of rotary

Washout Booth

Full sized wash out booth made of 1/4 inch high quality natural polypropylene. This booth is strong, durable and built to give you years of service.

- Welded main pan bottom drain.
- Locking side and back panels.
- Built-In screen supports.
- Easy to backlit.
- Color coded for ease of assembly.
- Bolt on legs.
- Shipped, knocked down.
- Polypropylene construction.

Washout Booth :
30³/₄" x 35³/₄" x 22³/₄"
\$675.00

Crating \$40.00

Filter Tank System

Filters Inks and Emulsions

Filter is an all-in one filtrations system that utilizes dual tanks to trap ink and emulsion solids and filter them before they reach the outflow. Use the filter with biogradable cleaners, discharge from the system is drain safe.

\$1625.00

Fits neatly under washout booths!!

Crating \$35.00

**Simple to
safe to use with septic systems..
compact in size..**

- Easy Maintance.
- Welded polypropylene system.
- 29" w x 15.25"d x 17"h.
- Attaches to your existing plumbing.
- Two filter housing.
- Float switch automatically maintains water level.
- Easy to operate and service.

FRANMAR

*Clean ▪ Simple
Biodegradeable ▪ Non Toxic ▪ Without the odor.*

Degreaser & Screen Dryer

Gallon **\$24.00**

D-Greaser - Helps eliminate pinholing. Ready to use. Rinses clean with hot or cold water. Removes solvent residues that interfere with tape sticking. Made from distilled CORN OIL. 100% biodegradeable.

Screenwash - Textile Inks

Gallon **\$32.95**

Bean-e-doo - Replace mineral spirits. A clean air solvent . No dangerous vapors. Biodegradable and non-toxic. Removes tape residues on frame edge. Made naturally from soybeans.

Emulsion Remover

Gallon **\$36.95**

Strip-e-doo - Reclaimer and degreaser. Removes alltypes of emulsion. Strongest emulsion remover available. Fast acting, thick - stays in place, ready to use. 100% biodegradable, recyclable and renewable.

Screen Wash

One Step Clear 2 1/2 Gallon Concentrate **\$144.95**

Removes Ink and Emulsion: less than 5 minutes submerged in tank and then power wash.

Mix 6 parts water to 1 part concentrate

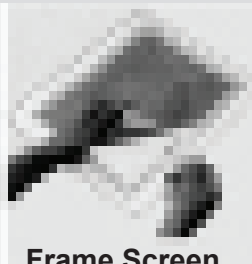

Thermal Screen Printing

Thermal Screens

Create Screen

Run screen & photo copied artwork through imager & make a stencil of your designs.

Frame Screen

Tape imaged (stenciled) screen to plastic frame.

1 Color Printing Base

Can either rest on tabletop or attach to table with C clamp.

Cat#BG220 \$129.95

Screen Stretcher

For quick and easy stretching & taping of screens enabling better printing.

Cat#BG536 \$26.95

Thermal Screens

Made from polyester mesh backed with plastic film.

When passing through the thermal imager the plastic backing melts away and the stencil is created. After printing with water based inks, the framed screen can be cleaned easily with water, dried and stored for future use. When used with water based inks, the 70 mesh screen can produce several hundred prints. Plastisol inks can be used for shorter runs.

Bulk Roll 70 Mesh Screens

Mini Roll (8-⁷/₈ x 21-¹/₂ yd) #BG520 \$219.95
Medium Roll (11-³/₄ x 21-¹/₂ yd) #BG521 \$239.50

Pre Cut Package

20 Screens 9"X11-³/₈ Mesh
#BG505 \$89.50

Squeegees

Used to push ink through your thermal screen. Designed specifically for WPI with a durable, wooden handle and a sturdy, rubber blade. Contoured for easy grip.

Full-size

#BG5131 7-³/₈" \$8.75

Half-size

#BG5131 4-³/₈" \$5.75

Extra Sturdy Frames

Heavy-duty black frames. More rigid than our standard frames.

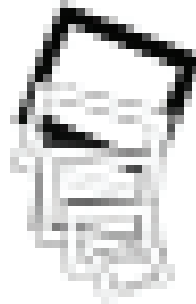

Re-usable

Full-size

(7-³/₄ x 10-¹/₂") #BG5064 \$4.50

Half-size

(4-⁷/₈ x 7-¹/₂") #BG50641 \$2.75

Screen Mounting Tape

Double sided sticky tape for mounting thermal screens to frames. Sufficient for approximately 40 full-sized frames.

#BG514 \$12.95

Spatulas

Plastic Spatulas For scraping paint out of jars and transferring to screen.

Wide Spatula

3-¹/₈" wide #BG516 \$0.95 each

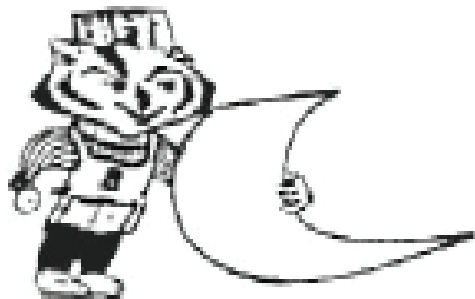

Standard Spatula

3-⁹/₁₆" wide #BG515 \$0.85 each

Screen Carrier - Reducer Mistakes

\$4.95 Each

Additives

Smooth Lith is a liquid smooth lay and anti-offset compound. It eliminates paper picking and aids ink distribution when printing large solids. **Quart 2150 \$19.00**

Three Way Drier is a combination drier which acts throughout the printed ink film to dry the ink. It dries slower and more thoroughly than cobalt driers and can be used when inks are to be overprinted. **1 LB Can V2125 \$22.00**

Liquid Cobalt Drier is a concentrated drier that is added to ink to speed drying and improve gloss. Cobalt drier should not be used when inks are to be overprinted. **1 LB Can V2163 \$23.00**

Overprint Varnish is a high gloss, low tack varnish which is overprinted on a printed surface to improve gloss and rub resistance. Added to ink it will improve gloss and prevent chalking on coated stocks. **4.5 LB Can V2175 \$54.00 1 LB Can V2174 \$14.00**

Tack Reducer is a paste reducer that lowers ink tack without altering the body of the ink. It is used for improving ink trap in multi-color printing and cutting tack to prevent curling of lightweight stocks. **1 LB Can V2162 \$17.00**

Aqua Flo Varnish #30 is a heavy bodied gloss varnish used to improve water resistance; it will correct ink emulsification and chalking away from the fountain. Combined with 3% drier it will correct scuffing and chalking. It can also be added to ink to improve powder adhesions for thermography. **1 LB Can #30 V2159 \$18.00**

Blanket Fix is used to repair low spots on blankets. It is easy to apply and there is no need to remove the blanket from the cylinder. **4 Oz Bottle V2004 \$9.50**

Pantone Formula Guide Solid Coated & Solid Uncoated
 (2 Book Set) Pantone Color Formula Guide-Matte Coated
V2100 \$95.00 V2206 \$60.00

Press Wash - Shop Chemistry - Fountain Solution²⁹

Press Wash - Varn

Press Wash - Varn Has a volatile organic content (VOC) of less than 3.5lbs per gallon. A stronger version of the Ecolo-Clean formula, it gives quicker "bite" into inks on rollers and blankets for faster, more thorough cleaning. Low vapor pressure, 07mm Hg.

Econo Wash

2x2.5 Gallon jugs per case \$137.00

Blanket & Roller Wash / Wash V-120 A professional one-step water miscible blanket and roller wash used world wide. It is a special blend of solvents and cleaners. Formulated for cleaning and rejuvenation lithographic blankets and rollers and other rubber, synthetic and composition rollers. Low vapor pressure 2.6mm mercury (Hg).

Gallon \$32.00 5 Gallon Pail \$140.00

Wash 253 V-133 High ink solvency without excessive solvent strength means that Wash V-133 gives a deep cleaning without damage to rollers, blankets or plates. In fact with the addition of modern antioxidants and plasticizers, Wash-V-133 helps prolong blanket and roller life, while maintaining them in a revitalized condition. Low vapor pressure, 2.6 mm (Hg)

Gallon \$29.50 5 Gallon Pail \$139.00

Fountain Solution - Varn

Total Fountain Solution One single product does the "total" job. No additional gum, etch or additives needed. Gives sharp, clean images with excellent ink and water control. Total is designed for medium to large sheetfed presses and small webs. **Gallon \$31.00**

Super Lene An outstanding multi-purpose fountain solution. Desensitizes the non-print area and keeps it clean without gray backgrounds. In-plant printers can get "big press" results over long runs, using a wide variety of plates. Performs well with both conventional and rubber based inks. **Gallon \$32.00**

Universal Pink An alcohol and glycerin-free, all plate, small press fountain solution. Runs well on black, polyester and metal plates. It runs exceptionally well in conventional and alcohol systems and is especially approved for use in the Kompac Automatic Dampening Systems. Universal Pink gives outstanding performance with all rubber base and oil base ink. **Gallon \$22.00**

100% Pure Gum Arabic 14°BE 100% Sudanese Gum Arabic Solution is manufactured from the highest quality selected amber sorts and is "Micro Filtered" to remove even the finest impurities. Guaranteed to be non-souring for a period of six months and is stabilized to retain its uniform viscosity. Flows to a smooth, thin, uniform film and offers maximum protection on the plates and maximum performance in the fountain. **Gallon \$45.00**

Specialty Items - Varn

Press Specialty True Blue Leading plate cleaner and conditioner for the graphic arts industry. Works on all types of metal plates. Quickly removes surface scratches, oxidation spots, semi-dried ink and gum. Simply the best. **Quart \$24.95**

pH Indicator Strips Specially designed for printers. Range of 3.6 - 6.1 100 strips per package. **\$13.95**

Wash Up Bottle Convenient 1-quart goose-neck squeeze bottle. Graduated markings in both oz. and ml. **Quart \$5.50**

Spray Powder - Varn

Anti off-set spray powders forms a separation between the sheets of stock as they leave the press. This separation traps air between the sheets to speed ink drying. It also breaks the suction effects of wet ink and static and prevents the ink from setting off onto the sheet above.

Coated Powders Product #C-230 A very popular coated medium-fine, free-flowing powder which leaves a satin smooth finish. Good for air guns and electro static units. **11LB Box \$39.50**

Coated Powders Product #C-270 A medium-fine coated spray powder for use in electro static and can also be used in air guns. Is good for smooth finishes on folding carton, light to medium stocks, and an excellent coated powder for all-around lithographic use. **11LB Box \$39.50**

Burnshine Products PUTZ POMADE

The first and still the best deglazer made today. Clean your press while it's still inked up with Putz Pomade®. Eliminates press while it's still inked up with Putz Pomade®. Eliminates glazing and stripping on rollers, Rejuvenates and reconditions blankets and rollers. Low VOC. Non-flammable. Works perfectly on large and small presses.

Liquid Form 1LB Can \$15.25 Y3 - 14 oz. tube \$17.50

Burnshine Products Plate Sav-ur

Plate Sav-ur is a superb cleaner conditioner and scratch remover for all metal plates. Removes scum, gum streaks and oxidation. Desensitizes plates - increases plate life. Makes plates accept ink better. Non-Flammable. Biodegradable.

Rubber Letter Press Rollers - Ready To Use

Rubber letterpress rollers will outlast composition rollers five to one and are furnished ready to use complete with steel cores.

Call For Prices

Die Cutters Channel Creasing Matrix

Channel Creasing Matrix is reinforced with a thin steel backing, a removable locating channel fits snugly over the die creasing rules. When the press is closed the matrix strip is pushed firmly against the cutting and creasing surface. A specially formulated adhesive on the underside causes the adhesive to adhere securely to the cutting plate. The matrix is easily removed on completion. Channel Creasing Matrix shown below are color keyed for simple identification.

Box of 28FT of any style **\$43.00**

- No. 40 - Buff creasing channel .040" thick for boards .010" and under.

 Electrical: 115v 60Hz (220V 50Hz avail)

Fast and easy set-up precedes even faster feeding speeds, variable up to 10,300 sheets per hour. The 1217A is ready to tackle a maximum sheet size of 11 3/4" x 18" and stock weight up to

90# bond. Simple set-up and operation make the 1217A a perfect folder for use with 11" x 17" duplicators. Folded sheets emerge overlapped for easy handling. Order the Model 400 Jogger for efficient paper handling and loading and the 960 Machine Stand for a solid, yet moveable foundation.

Ingento Classic Maple Paper Cutters

Non-wrap construction, with permanently visible grooved squares. Tempered and hollow ground blades that cut clean every time. Tension spring blade remains at any desired height, prevents accidental dropping or unexpected snap up of handle. Recessed 1/8" graduated ruler prevents snagging of materials. Single control guide saves time in cutting paper to same size. Cuts from lightest tissue to toughest cardboard. All cutters have guardrails.

ISP's R106 Electric Staplers are an economical approach to handling a limited range of basic, less demanding, light duty, applications with paper, thin boxboard, or lightweight packaging.

Standard features shared by both staplers:

- Adjustable stapling power and adjustable stapling depth up to 100 mm.
- Foot pedal is easy to connect, requiring only a plug-in contact.
- Double triggers are individually adjustable.
- Automatic work trip or foot pedal actuated stapling.
- Front loading of staples for ease and convenience.
- When sight shield is raised, unit will not operate.
- When set up in a side-to-side series, connections by optic cables make it possible for all staplers to actuate simultaneously.

Loaders, Cassettes, Cable Releases & Acufine Developers

Watson Model 100 Bulk

Film Loader

This is the latest model of the popular Watson Film Loaders. After loading it in the dark, lights can be turned on and cartridges can be loaded in the light. Accepts 100 ft bulk rolls. Indexed dial shows how many frames have been wound into cartridge. Light trap interlock prevents film scratches or fogging. Accepts all cassettes. Has no loose parts.

\$57.50

Acufine Developer

Description

A maximum acutance, ultra-fine grain film developer, combining optimum quality, with great effective film speed. Similar to Acufine developer, but to be used as a "one-shot", throw away developer. Same increase in film speed ratings without sacrificing grains or contrast. Concentrate features practical and convenient dilution ratio of 1:5 and 1:10 and is an ideal preparation for the occasional user and for those preferring a non-replenishing "one-time" developer. One quart will process over 40 rolls of film at the 1:10 ratio with all the quality advantages of Acufine Developer.

MFG # Description

ACD32 Acu-1 Film Developer
Quart **\$8.00** Gallon **\$14.00** 5 Gallon **\$50.00**

Diafine Developer

Description

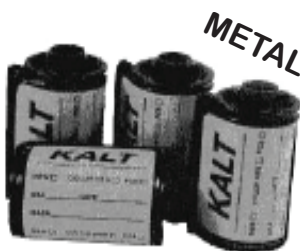

Diafine is usable over a wide temperature range with one developing time for all films. Fast, medium and slow films can be developed simultaneously without adjustment in developing time. Diafine is unsurpassed in its ability to produce the greatest effective film speed, ultra-fine grain, maximum acutance and highest resolution. Time and temperature have no practical effect if the minimum recommendations are observed. Diafine is an ultra-fine grain developer with the highest effective speeds.

MFG # Description

DFD128 Gallon - **\$25.00**
