

## Frame Lumber Cord

Especially made to fit the grooves of your frame lumber. This cord is uniform to prevent fabric slippage. Hammer in cord flush to wood, and then use stretching tool to push cord deeper into groove for more tension. Available in three diameters to accommodate your screen making needs. Standard is the most popular cord. Large is for slightly wider grooves in lumber or thinner mesh. Small is for slightly narrower grooves or coarser mesh.

## Tapes

### Cloth Staple Tape ST-916 \$9.50 3 Rolls-\$27.00

Strong polyester synthetic staple tape is placed over stretched fabric on frame and then stapled through mesh to frame. Holds mesh in place and prevents slippage. Also use staple tape for extra reinforcement, strength to hold fabric in place, after applying frame adhesive. For easy and quick reclaiming. Pull tape away to remove most of the staples at one time, not affected by solvents in dip tanks.
